Skills

Javascript, React.js, Ruby, Rails, SQL, C / C++, JQuery, HTML, CSS, Git, Linux

---

Projects

Ruby Runner (https://github.com/bmartinson5/ruby-IDE) {React, Ruby on Rails, and SQL}
In browser ruby interactive development environment that runs code and tests whether it solves the algorithm that was chosen by the user.

Sudoku Solver (https://github.com/bmartinson5/sudoku-solver) { Javascript, Jquery }
Allows users to fill out a sudoku puzzle and includes responsive error highlighting functionality. The program can fill in any semi-completed puzzle with a correct solution.

Reliable Transport Protocol (https://github.com/bmartinson5/ReliableProtocol) { C++ }
 A client/server file transfer program that simulates TCP. Uses stop and wait packet reliability checking, UDP sockets, pthreads and system timers.
